# WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT, BREAKER

Carefully unpack your new fixing and lay out all the parts in a clear arrea. Make sure not to misplace any small parts necessary for rodallation

## ASSEMBLING THE FIXTURE (Fig.2)

1. Return the eight arms to suitable position, see figure 2.

Attach the loop (A) to center of the fixture body (B) by turning it clockwise until tight.

3. Attach the arm (L) to the bottom of the fixture body (B), then tighten it with the coupling (C), thread the pipe napple (K) into bottom of the coupling (C) and lock it securely with the hex nut (I). attach the twist tubing (M) through the center of the arm (L) onto the pipe mipple (K), then look it with the small loop (N) of the acryl.

4. Place the socket sleeve (I) and the spider ring (H) over the socket of the fixture body (B), then lock it securely with the check ring (G) Justall the light bulb (NOIE: DO NOT EXCRED THE SPECIFIED WATTAGE!) and put the glass shade (F) on to the spider ring (H), then put the decorative frame (E) over the glass

Attach the crystal (D) to the small ring of the small shown.

Install the light bulbs in accordance with the fixture specifications.

HANGING THE FIXTURE (Fig.1)

IMPORTANT: For a safe and secure installation, this fixture must be installed by means of support that is independent of the outlet hox.

#### SUGGESTED INSTALLATION:

Shut off the power at the circuit breaker and remove old fixture from ceiling, including the old crossbar.

Provide a 1/4" IPS pipe with one end securely mounted to a beam or a structural manufer. The other end should protrude through the center of the order box as shown.

3. Assemble the ceiling loop, nipple, nuts and frickey to center 1/4"IPS support pipe and adjust overall length to allow the lock collar to hold the canopy flush to the ceiling. When the adjustments have been completed, secure the farce (3) nuts, as shown.

Attach the chain to the fixture loop (A). Slip the lock collar and canopy over the upper end of the chain. Open the end link of the chain and lift the fixture to attach to the ceiling loop and secure the link

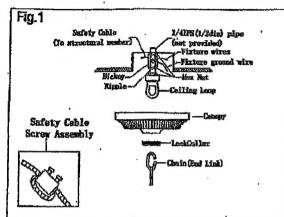

5. Lace the fixture wires, ground wire and safety cable through the chain and loop, exiting through the side of hickey. Run the safety cable through the top of the outlet box and secure to sinuctural member

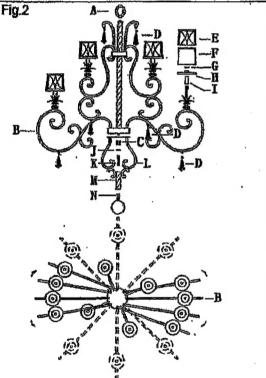

# CONNECTING THE WIRES (Fig.3)

- 1. At this point, connect the electrical wires as shown in Fig.3 making sine all wine mis are secured. You may have to wrap the connections with electrical tape. If your outlet has a ground wire (green or bare copper), connect fixture's ground wire to it. Otherwise connect fixture's ground wire directly to the impetion
- Tuck these wire connections nearly into the ceiling junction box.
- Raise the lock collar and thread onto ceiling loop protrading through canopy.

Your installation is now complete. Return power to the junction box and test the fixture
